

Our factories are located on an alluvial area of the Mekong region, we have been investing in over 100 million m<sup>2</sup> land area for high quality rice cultivation with the average yield of 700 tons/day, total output reaches 220,000 tons/year.

has 6 plants with a total capacity of 70,000 tons of rice. These plants are located in the areas convenient for export-import business in the Cuu Long Delta River region, especially in Can Tho and Longan province.

The equipment of a modern technology line for rice production has contributed to raise the capacity to 129,000 tons/year. Which highlights are:

- 7 high poly polishing lines with capacity of 90.000 tons/ hour
- 1 milling line with capacity of 14 tons/ hour
- 1 Sotex SATAKE system (Optical Sorter) designed with tank system an automatic input-output storage tank system with capacity of 10.000 tons

With modern technology lines, we committed to providing products meeting the highest quality as well as customer expectations.
